PASHUPATI CHAUDHARY

Flutter Developer · Mobile Application Engineer (Android & iOS)

Kathmandu, Nepal | +977 9813704884 | pashupatic121@gmail.com | github.com/pashupati-git | linkedin.com/in/pashupati-chaudhary

PROFESSIONAL SUMMARY

Computer Engineering graduate and **Mobile Application Developer** with comprehensive expertise in production **Flutter (Dart)** and native **Android (Kotlin)** engineering. Currently working at **Classic Tech** (8+ months), architecting, optimizing, and maintaining mission-critical applications across an active ecosystem of **110,000+ Google Play installs** (including Caro TV Nepal, Classic Tech Customer App, Classic Engine, and Dealer Partner). Proven track record in **Clean Architecture**, **BLoC & Riverpod** state management, native **Kotlin platform channels** (ExoPlayer video decoding, optical network diagnostics), national **payment gateway integrations (eSewa, Khalti, ConnectIPS, Fonepay)**, automated **CI/CD pipelines (Codemagic & GitHub Actions)**, comprehensive testing, and end-to-end store publishing to **Google Play Store** and **Apple App Store**.

TECHNICAL SKILLS & CORE COMPETENCIES

Mobile Engineering:	**Flutter & Dart**, Android (Java/Kotlin), iOS (Flutter), Android TV D-Pad navigation	**Architecture & Patterns:**	**Clean Architecture**, MVVM, Repository Pattern, SOLID Principles, Modular Code
State Management:	**BLoC / Cubit**, **Riverpod**, GetX, Provider, Reactive Programming	**Native Platform Channels:**	**Kotlin bridging**, ExoPlayer video playback, Wi-Fi / optical diagnostics, biometrics
Payment Gateways:	**eSewa**, **Khalti**, **ConnectIPS**, **Fonepay**, IME Pay, Webhooks & Tokenization	**CI/CD & DevOps:**	**Codemagic**, **GitHub Actions**, Keystore signing, Build flavors, Release tracks
Testing & Quality:	Flutter **Unit Testing**, **Widget Testing**, Integration Testing, Mock APIs, Profiling	**Store Publishing:**	**Google Play Console** (AAB, policy compliance, phased rollouts), **App Store Connect**
Backend & Cloud:	REST APIs (Dio + Interceptors), Firebase (Auth, Firestore, FCM, Storage), WebSockets	**Local DB & Storage:**	**Hive**, SQLite / Drift, SharedPreferences, Offline-first cache synchronization

PROFESSIONAL EXPERIENCE

Mobile Application Developer · Classic Tech

Mar 2026 – Present (8+ Months)

FULL-TIME New Baneshwor, Kathmandu, Nepal · Nepal's Premier Broadband ISP & Network Provider

- **Ecosystem Leadership:** Architect, maintain, and enhance mission-critical Flutter and Kotlin production apps serving over **110,000+ active subscribers** across Nepal (Caro TV Nepal, Classic Tech Customer App, Classic Engine, Dealer Partner).
- **Digital Payment Gateways:** Engineered and maintained end-to-end payment gateway integrations with **eSewa, Khalti, and ConnectIPS** for subscription renewals, online recharge, and tax-compliant invoice generation, handling high transaction volumes with zero reconciliation discrepancies.
- **Native Kotlin Video Player Bridging:** Developed native Android platform channels bridging **Google ExoPlayer** for hardware-accelerated HLS live IPTV streaming in **Caro TV Nepal**, achieving sub-second channel switching and flawless Android TV D-pad remote navigation.
- **Low-Level Hardware Diagnostics:** Built custom Kotlin platform channels for querying optical router interfaces, testing Wi-Fi signal parameters, and running optical power level diagnostics (dBm) directly on customer devices.
- **Automated CI/CD Pipelines:** Implemented end-to-end mobile CI/CD workflows using **Codemagic and GitHub Actions** for automated linting, unit testing, keystore code signing, build flavors (dev/prod), and direct deployment to Google Play Store tracks, cutting release turnaround by **65%**.
- **Field Operations & Offline Synchronization:** Engineered offline task caching, auto-sync queues, and GPS-based work order routing in **Classic Engine**, ensuring uninterrupted operations for over 10,000 field technicians in areas with poor cellular coverage.
- **Sole Mobile Ownership (NNET):** Architected, built from scratch, and independently published the **NNET Customer Self-Care** app to Google Play Store, managing architecture, UI, REST APIs, and full store compliance.

Flutter Developer Intern · MindRisers Institute of Technology

Sep 2025 – Feb 2026 (6 Months)

INTERNSHIP Putalisadak, Kathmandu, Nepal · Professional Tech Development & Training Hub

- **Architecture & Design:** Built cross-platform mobile applications from Figma prototypes adhering strictly to **Clean Architecture** (Presentation, Domain, Data) and **MVVM** design patterns.
- **Reactive State Management:** Architected state management using **Riverpod**, creating modular, testable, and maintainable widget trees with decoupled business logic.
- **Bilingual Localization & API Integration:** Implemented comprehensive internationalization (English & Nepali) and integrated REST APIs via **Dio** with token refresh interceptors, global exception handlers, and response models.
- **Cloud & Offline Persistence:** Configured Firebase Authentication (Phone OTP, Google), Cloud Firestore, Cloud Storage, and implemented **Hive local database** for offline data persistence and instant cache retrieval.
- **Agile Team Collaboration:** Actively participated in agile sprint planning, daily standups, Git PR reviews, code refactoring, and UI performance profiling to sustain smooth 60fps animations.

PRODUCTION MOBILE APPLICATIONS & KEY PROJECTS

Caro TV Nepal — Live TV & IPTV Streaming Platform `1,000+ INSTALLS · GOOGLE PLAY` 2025 – 2026

`Flutter · BLoC · Native Kotlin · ExoPlayer · HLS Streaming · eSewa / Khalti · Codemagic CI/CD · Android TV`

- Developed high-performance IPTV live streaming client handling nationwide television channels with adaptive bitrate streaming.
- Bridged native Android Kotlin platform channels to **ExoPlayer** for hardware decoding, buffer optimization, and remote D-pad navigation.
- Integrated in-app subscription renewals and digital wallet recharges via **eSewa and Khalti** with instant payment verification.
- Configured automated Codemagic and GitHub Actions CI/CD for continuous testing, keystore signing, and Google Play Store delivery.

Classic Tech App — Flagship Broadband Customer Self-Care `100,000+ INSTALLS · GOOGLE PLAY` 2025 – 2026

`Flutter · Kotlin · MVVM · eSewa · Khalti · ConnectIPS · Router Diagnostics · REST APIs · Codemagic`

- Engineered key customer self-service modules serving over **100,000 active internet subscribers** across Nepal.
- Implemented multi-gateway payment processing (**eSewa, Khalti, ConnectIPS**) for automated bill renewals and statement history.
- Built native Kotlin platform bridges for optical router diagnostics, Wi-Fi signal inspection, and real-time support ticket tracking.

Classic Engine & Dealer Partner — Enterprise Operations `11,000+ COMBINED INSTALLS · GOOGLE PLAY` 2025 – 2026

`Flutter · BLoC · Clean Architecture · Google Maps API · Offline Caching · dBm Diagnostics · Biometrics · REST APIs`

- Streamlined field operations for technicians managing FTTH installations, live optical power level testing (dBm), and GPS customer routing.
- Architected offline task caching and auto-sync queues in Classic Engine, alongside dealer commission ledger tracking in Dealer Partner.

NNET — ISP Customer Self-Care & Diagnostic Portal `SOLE MOBILE ENGINEER · GOOGLE PLAY` 2026

`Flutter · BLoC · Payment Gateways · Biometrics · WebSockets · Push Notifications · Clean Architecture`

- Solely architected, developed from scratch, and deployed the production app to Google Play Store meeting all 2026 Google Play requirements.
- Built full customer billing lifecycle with digital payment gateways, optical router signal tests, and real-time outage notifications.

SheGuidesMe & Totto — Community & Travel Marketplaces `PRODUCTION APPS · GOOGLE PLAY` 2025 – 2026

`Flutter · Riverpod · Firebase · Real-time Chat · Google Maps API · Django REST · Responsive Mobile UI`

- Contributed to **SheGuidesMe** mobile marketplace connecting global travelers with verified local guides via real-time chat and Riverpod.
- Developed **Totto** buy-and-sell community marketplace app with real-time buyer-seller negotiation chat and OTP authentication.

LeafCare — Plant Disease Detection via CNN & Agricultural Marketplace `FINAL YEAR CAPSTONE PROJECT` 2024 – 2025

`Flutter · TensorFlow Lite (TFLite) · CNN · Python / Keras · Cloud Firestore · Edge AI Inference`

- Trained a Convolutional Neural Network (CNN) on plant pathology datasets and quantized it to **TensorFlow Lite (TFLite)** for on-device, low-latency offline edge inference on mobile devices; built Flutter UI for instant diagnosis and agri-eCommerce.

HomeLink — Real Estate & Property Discovery Web Platform `FULLSTACK MERN APP` 2024

`MongoDB · Express.js · React · Node.js · JWT Authentication · RESTful API · Geospatial Queries`

- Architected fullstack property marketplace featuring multi-parameter search (price, location, amenities), JWT auth, and geospatial queries.

EDUCATION & ACADEMIC JOURNEY

Bachelor in Computer Engineering
Nepal Engineering College (Affiliated with Pokhara University)
July 2021 – Aug 2025 · Changunarayan, Bhaktapur, Nepal
Core: Software Engineering, Data Structures & Algorithms, OS, DBMS, Networks, Machine Learning. Started Flutter development in 4th year; built **LeafCare** capstone, completing 1 year of intensive self-learning and project engineering.

National Examination Board (NEB) · +2 Science
White House Secondary School
Apr 2018 – Apr 2020 · Khumaltar, Lalitpur, Nepal
Major in Physical Science (Physics, Chemistry, Mathematics, Computer Science). Built solid analytical, algorithmic, and mathematical foundation.

PROFESSIONAL TRAINING & CERTIFICATIONS

Professional Flutter & Dart Apprenticeship Certification 2025

`CREDENTIAL ID: MR-81031-FL` Mind Risers Consortium · Kathmandu, Nepal · Verify Credential Online (MR-81031-FL) ↗

- Completed **4 months of intensive physical, classroom-based engineering classes** and real-world project development covering Dart internals, Flutter widget rendering pipeline, Clean Architecture, Riverpod state management, Hive local storage, Firebase integrations, and mobile publishing.

LANGUAGES & WORK AUTHORIZATION

Spoken Languages:	**English** (Fluent / Professional Working Proficiency), **Nepali** (Native), **Hindi** (Proficient)	**Work Availability:**	Full-time, Hybrid, Remote or On-site in Kathmandu · Authorized to work in Nepal & open to international relocation
